

type number: **SD 1_PO, SD 3_PO**

product description: The group holder is suitable for creating a non-standard cable route while maintaining functionality during a fire.

The holder is standardly supplied in a closed position and is equipped with two plastic components, which allow the holders to be shot onto the ceiling and walls using various types of shot nails. Attachment is also possible with a conventional screw into concrete or other suitable anchoring elements.

The construction of the group holders allows for easy addition of cables to the route up to the maximum allowable load.

The spacing of the group holders to meet functional capability according to ČSN 73 0895, DIN 4102-12, and STN 92 0205 is 300 mm or 600 mm.

The cables used must be those with which the group holder has been tested.

maximum load: 3–6 kg/m (SD 1_PO and SD 3_PO)

surface finish: galvanized

sales amount: á 1 pc

package: 100 pcs (SD 1_PO)
50 pcs (SD 3_PO)

classification: ČSN 73 0895 P 90-R
DIN 4102-12 E 90
STN 92 0205 PS 90

Fire classification is depend on the specific conditions of the cable tray, detailed in the catalog Systems with maintained functionality in fire.

storage: EN 60721-3-1
